EDUCATION

University of Waterloo
Bachelor of Computer Science

Waterloo, ON
Expected Dec 2027

WORK EXPERIENCE

Scrawlr

Backend Software Developer

Vancouver, BC
Jan 2026 – Apr 2026

- Designed and built a cron-based email notification pipeline that queried application data to identify eligible recipients and automatically delivered scheduled communications
- Built location-based search and filtering for short-term accommodations, integrating Google Places API for real-time destination autocomplete and querying listings by user-selected criteria
- Developed organization-scoped authentication and property search workflows for partner organizations, enforcing tenant-specific access controls and listing visibility

Avante IO

Software Engineering Intern

Toronto, ON
May 2025 – Aug 2025

- Implemented an asynchronous background job processing system for AI-powered file processing, incorporating job queuing, status tracking, and failure handling
- Built a Django BI reporting application using unmanaged models and PostgreSQL views to aggregate application data and support complex reporting queries
- Designed and executed database migrations to support evolving application requirements while maintaining data integrity and backward compatibility

Definity

Software Automation Developer

Waterloo, ON
Sept 2024 – Dec 2024

- Integrated Tricentis Tosca end-to-end automated tests with BrowserStack using Java, enabling cross-platform testing across multiple mobile devices and browsers
- Automated end-of-month reporting in Excel using VBA scripts to retrieve and format Jira data, reducing manual reporting effort by 16 hours per month

Dreamschools

Fullstack Software Developer

Toronto, ON
Jan 2023 – Aug 2023

- Implemented pagination and optimized PostgreSQL queries, reducing page load latency by 85% through more efficient data retrieval
- Developed and maintained RESTful APIs, implemented new endpoints, and updated legacy API systems to enhance functionality and improve performance
- Contributed to the development and enhancement of the cart checkout workflow, which efficiently processes over \$75,000 in monthly transactions

PROJECTS

HSIntellect - JavaScript, Electron

- Real-time Hearthstone deck tracker in Electron that parses game logs and renders live game-state data through an in-game overlay

Verbolt - Python, FastAPI, TypeScript, React

- Multimodal translation application supporting text, image, voice, and video translation across multiple languages

Rainbow Renderer - C++

- Physically based rainbow renderer built on a custom ray tracer that simulates dispersion, internal reflection, and Fresnel attenuation through water droplets to render a rainbow

WATtoEat - Kotlin, Compose Multiplatform, Supabase

- Food discovery platform that helps University of Waterloo students find and explore nearby restaurants based on their preferences, location, and dining needs

SKILLS

Languages: Python, JavaScript, TypeScript, C++, SQL, HTML/CSS

Technologies: React, Node.js, Django, FastAPI, PostgreSQL, Redis, Docker, AWS, GCP, Git, GitHub
