SKILLS

Languages: Python, JavaScript, TypeScript, C, C++, SQL, HTML, CSS
Technologies: Git, Django, Docker, React, Node.js, Express.js, Fastify, GCP, AWS, Redis, PostgreSQL

WORK EXPERIENCE

Scrawlr

Backend Software Developer

Vancouver, BC
Jan. 2026 - Apr. 2026

- Designed and implemented cron job automation for email and in-app notifications, reducing manual communication overhead and improving messaging consistency
- Enhanced application search functionality by integrating Google Places API for real-time destination suggestions and improved search efficiency
- Developed organization-scoped account and search workflows to enforce partner-specific property listing visibility and access restrictions

Avante IO

Software Engineering Intern

Toronto, ON
May 2025 - Aug. 2025

- Migrated legacy authentication workflows to OAuth 2.0 using Apigee in a Django backend, improving API security, and standardizing authorization processes
- Developed a Django application for BI reporting using unmanaged Django models and PostgreSQL views to aggregate and organize data for efficient reporting
- Configured API rate limiting and throttling in Django to improve system stability under high traffic conditions and prevent resource overutilization

Definity

Software Automation Developer

Waterloo, ON
Sept. 2024 - Dec. 2024

- Developed and executed end-to-end automated test cases using Tricentis Tosca, resulting in a 17% reduction in errors and bugs
- Synchronized Tosca automated test results with BrowserStack using Java, enabling cross-platform testing across multiple mobile devices and browsers for enhanced test coverage and reliability
- Automated end-of-month reporting in Excel using VBA scripts to retrieve and format Jira data, reducing manual reporting effort by 6 hours per month.

Dreamschools

Fullstack Software Developer

Toronto, ON
Jan. 2023 - Aug. 2023

- Implemented pagination and optimized SQL queries in PostgreSQL, reducing page load times by up to 300% and enhancing the overall performance of the application
- Developed and maintained RESTful API, implemented new endpoints, and updated legacy API systems to enhance functionality and improve performance
- Contributed to the development and enhancement of the cart checkout workflow, which efficiently processes over \$75,000 in monthly transactions

PROJECTS

WATtoEat - Kotlin

- Developed a desktop application in Kotlin using Jetpack Compose to help users find nearby restaurants based on preferences and location
- Created an interactive filtering system where users can refine their restaurant search by type of cuisine, price, location, and distance
- Developed a map integration feature to display restaurant locations using OpenStreetMapAPI

EDUCATION

University of Waterloo

Bachelor of Computer Science

Waterloo, ON
Expected Feb 2028
